

MANUFACTURING AND TRADE INVENTORIES AND SALES, JULY 2025

Release Number: CB25-138

September 16, 2025 — The U.S. Census Bureau announced the following new manufacturing and trade statistics for July 2025:

 BUSINESS INVENTORIES		
JULY 2025	\$2,666.7 billion	+0.2%
JUNE 2025 (revised)	\$2,661.0 billion	+0.2%
Next release: October 16, 2025		
* The 90 percent confidence interval includes zero. There is insufficient evidence to conclude that the actual change is different from zero. Data adjusted for seasonality but not price changes. Source: U.S. Census Bureau, Manufacturing and Trade Inventories and Sales, September 16, 2025.		

Sales

The combined value of distributive trade sales and manufacturers' shipments for July, adjusted for seasonal and trading day differences but not for price changes, was estimated at \$1,948.2 billion, up 1.0 percent (± 0.2 percent) from June 2025 and was up 4.0 percent (± 0.3 percent) from July 2024.

Inventories

Manufacturers' and trade inventories for July, adjusted for seasonal and trading day differences but not for price changes, were estimated at an end-of-month level of \$2,666.7 billion, up 0.2 percent (± 0.1 percent) from June 2025 and were up 1.5 percent (± 0.3 percent) from July 2024.

Inventories/Sales Ratio

The total business inventories/sales ratio based on seasonally adjusted data at the end of July was 1.37. The July 2024 ratio was 1.40.

General Information

The August 2025 Manufacturing and Trade Inventories and Sales Report is scheduled for release on October 16, 2025. View the full schedule in the Economic Briefing Room: <www.census.gov/economic-indicators/>.

EXPLANATORY NOTES

Statement Regarding Natural Disasters

For information on the impact of natural disasters on the compilation of this report, please see www.census.gov/wholesale/natural_disaster_faqs.html and www.census.gov/retail/mrts_weather_faqs.html.

Reliability of Estimates

The sampling variability for retailers and merchant wholesalers can be used to construct a 90 percent confidence interval for the estimates. Over all possible samples, 90 percent of such intervals will cover the true estimate. These intervals are given in parentheses for the estimates on the front page. If, for example, the estimate is up 0.8 percent and the margin of sampling error is ± 1.2 percent, the 90 percent confidence interval is -0.4 percent to +2.0 percent. If the range contains 0, it is uncertain whether there was an increase or decrease. Measures of reliability for Retail and Wholesale sales and inventory levels and changes are included in the detailed monthly press releases for those Industries. Manufacturers do not contribute to estimates of sampling variability because the manufacturer's mail panel is not a probability sample from a known frame and standard errors of the industry estimates cannot be calculated. Estimates from all three surveys are also subject to nonsampling errors, which can arise in any stage of the survey. Such errors include coverage error (failure to accurately represent all population units in the sample) response errors, coding errors, and nonresponse. Although no direct measurement of these errors has been obtained, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data to minimize their influence.

Description of the Survey

The Manufacturing and Trade Inventories and Sales estimates are based on data from three surveys: the Monthly Retail Trade Survey, the Monthly Wholesale Trade Survey, and the Manufacturers' Shipments, Inventories, and Orders Survey. Data for the wholesale and manufacturing sectors are unrevised from the most recent Monthly Wholesale Trade Report and the Full Report on Manufacturers' Shipments, Inventories and orders. Data from the Retail sector is revised and presented in more detail from the most recent Advance Economic Indicators Report. For more information on these surveys see the links below:

www.census.gov/retail/, www.census.gov/wholesale/, and www.census.gov/manufacturing/m3/.

The Census Bureau has reviewed this data product to ensure appropriate access, use, and disclosure avoidance protection of the confidential source data, (Project No. P-7504206, Disclosure Review Board (DRB) approval number: CBDRB-FY25-0002), (Project No. 7503922, Disclosure Review Board (DRB) approval number: CBDRB-FY25-0004), (Project No. P-6000307, Disclosure Review Board (DRB) approval number: CBDRB-FY25-0224).

(p) Preliminary estimate.

(r) Revised estimate.

¹ Adjusted for seasonal variations, trading day differences, and, in the case of sales, for holiday variations. Concurrent seasonal adjustment is being used to adjust all sales, shipment and inventory estimates. Concurrent seasonal adjustment uses all available unadjusted estimates as input to the X-13ARIMA-SEATS program. The factors derived from the program are applied to the current and previous month estimates and for retail and wholesale estimates a year ago as well. For retail sales, concurrent seasonal adjustment is also used to adjust the advance estimates (published one month before the preliminary estimates) and the estimates one year before the advance month. This explains the revision to retail estimates from a year ago.

² Manufacturers sales refer to the value of shipments by manufacturers. The shipments data from individual manufacturers are adjusted prior to tabulation for the number of trading days as well as for any variations in the length of the reporting period.

³ Adjusted and not adjusted inventories for aggregate levels of retail trade total, total excluding motor vehicles and parts, and motor vehicle and parts dealers are revised from the Advance Economic Indicators Report.

⁴ The 2017 North American Industry Classification System (NAICS) defines merchant wholesalers as including manufacturers' sales branches and offices. However, the estimates included in this release exclude manufacturers' sales branches and offices. Note that this is not a change in coverage from prior releases and is consistent with the description used in the Monthly Wholesale Trade Survey data products.

Data adjusted for seasonality and trading day differences, but not for price changes. Explanations of confidence intervals and sampling variability can be found on our website at <www.census.gov/mtis/how_surveys_are_collected.html>. Estimates include data only for businesses with paid employees. Prior to the benchmark report released in April 2025, the monthly retail estimates that were released in the Manufacturing and Trade Inventories and Sales estimates included nonemployers.
